

Diploma in AutoCAD

INTRODUCTION

The term CAD (Computer Aided Design) applies to a wide range of programs that give the user the ability to create drawings, plans, and designs electronically. AutoCAD is a commercial computer aided design (CAD) and drafting software application. Developed and marketed by Autodesk. Its main claim to fame is that it is relatively easy to use, it is very comprehensive in its ability to create 2D and some 3D drawings, wide variety of industries such as Civil, Mechanical and Electrical engineering and it is very Popular. Seventy percent of the CAD users in the world use AutoCAD.

OBJECTIVES

AutoCAD 2D training course objective is to prepare participants with in-depth skills to use 2D CAD drawing, design, and drafting using a 2D drafting tool in industries. Upon completion participants will be able to navigate the interface comfortably, use the features, use the fundamentals features and precision drafting tools in AutoCAD to develop accurate technical drawings and present drawings in a detailed and visually impressive manner.

WHO SHOULD ATTEND

Draftsman, Architect, all engineers, designers and technical persons.
